Ingredients

Vanilla bean ice cream, to serve

Method

Stir the baking soda and boiling water together in a small bowl, and then add to the butter. Be careful, because it will foam up.

STEP 5

Quickly add the butter to the dry ingredients and stir together with a wooden spoon.

STEP 6

Take tablespoons of the mixture and roll them into walnut sized balls. Place them on the baking trays, leaving plenty of room between them as they spread to double their size.

STEP 7

Bake for 10-12 minutes or until golden brown and spread. Cookies will be very soft, leave them to cool on the tray for five minutes before transferring to a wire rack.

STEP 8

Once cooled, create ice cream sandwiches with a scoop of vanilla ice cream and serve immediately, yum!
